

# Undercounter unit for buffets InvisiFreeze™ S (GN1/1)

Article number 1 60 100 00

Cooling unit for invisible installation under surfaces made of various materials such as artificial stone or glass.

## Advantages:

- ✓ A maximum of flexibility in designing individual, modern buffet furniture
- ✓ Cover material can be used as a continuous surface without cut-outs
- ✓ Even surface that can be easily cleaned and disinfected
- ✓ Highly energy-efficient due to modern technology
- ✓ Precise power regulation at the touch of a button

## Features:

|                             |  |
|-----------------------------|--|
| 4 power levels              | temperature range -10°C - 5°C                                |
| Direct control on device or | external control panel or infrared remote control (optional) |
| InvisiFreeze™ Bus           | up to 16 units in a network can be controlled with one panel |
| USB port                    | for software updates and read-out                            |

## Technical Data

|                                      |                        |
|--------------------------------------|------------------------|
| Dimensions:                          | 630 x 425 x 300 mm     |
| Weight:                              | 35 kg                  |
| Size of cooling area:                | GN 1/1                 |
| Max. power:                          | 500 W                  |
| Input voltage range:                 | 220-240 V AC, 50/60 Hz |
| Internal electrical fuse protection: | 6.3 A                  |
| Cooling liquid                       | R290 (propane)         |
| Connection:                          | C13                    |

## Accessories overview (optional)

Power cord 1500 mm, country specific connector, 10A

InvisiFreeze™ external control panel

InductWarm® infrared remote control (incl. battery)

Connecting cable to the external control panel

InductWarm® BUS cable, 2000 mm
